

Dropbox alternative for Linux users

With the recent announcement that Dropbox is dropping its support for linux filesystems (other than ext4) in November, you'll no doubt be searching for an alternative cloud storage provider that supports linux file system synchronisation.

Look no further than [MEGA](#).

50GB for free, local filesystem synchronisation, download and retain your own private key, a great, easy to use web browser client.

File system sync client: <https://mega.nz/sync>
