

Retro Terminal

[This](#) is just too good.

```
sudo add-apt-repository ppa:noobslab/apps
```

```
echo "deb http://archive.ubuntu.com/ubuntu/ xenial main  
universe" | sudo tee /etc/apt/sources.list.d/depd-CRT.list
```

```
sudo apt-get update
```

```
sudo apt-get install qml-module-qt-labs-settings qml-module-  
qt-labs-folderlistmodel
```

```
sudo apt-get install cool-retro-term
```

```
sudo apt-get -f install;sudo apt-get install cool-retro-term
```

```
sudo dpkg -i -force-overwrite /var/cache/apt/archives/cool-  
retro-term*.deb;sudo rm /etc/apt/sources.list.d/depd-  
CRT.list;sudo apt-get update
```
